The Kennel Club

KC/BVA/ISDS EYE EXAMINATIONS

Below is a list of Kennel Club registered dogs of the breed specified below, together with their sire and dam, giving the date that they were examined under the Eye Scheme, and the result of that examination. Each dog is found to be either unaffected by the eye condition(s) known to be inherited in that breed, or affected by conditions(s) indicated. In general, eye examinations should be conducted annually. Further information on this scheme can be obtained from The Kennel Club or The British Veterinary Association

The key to abbreviations for conditions are as follows: CEA Collie eye anomaly, CHC Congenital hereditary cataract, CPRA Central progressive retinal atrophy, G Goniodysgenesis/primary glaucoma, GPRA Generalised progressive retinal atrophy, HC Hereditary cataract, MRD Multifocal retinal dysplasia, PHPV Persistent hyperplastic vitreous, PLL Primary lens luxation, PPM Persistent pupillary membrane, TRD Total retinal dysplasia
